# YAPLUKA 85' D.D.

Yacht Industries has started working on their first "double deck" catamaran, "Yapluka 85' DD." This configuration has allowed the shipyard to give more space to the owner's master cabin that is situated in the bow area on the main deck. The cabin in fact comprises a central double bed, a stand in wardrobe and a large bathroom area in a segment of the port hull. Other compartments along it enclose two cabins with bathroom, one of which, is a suite and another has separate berths. The starboard hull, instead, hosts aside from a second suite, the galley and the crew's quarters. These entail a wardroom and two cabins for a total of four berths and a bathroom. A large space amidships is entirely taken up by the dining room and saloon complete of a corner bar. A cockpit, outside, hosts in the shade of the fly bridge's stern extension, an actual open air saloon, with sofas, chairs and coffee tables, that is ideal for luncheons or partying when moored. The sun deck, as imaginable, sports a series of cushion pads for the benefit of sun lovers as well as a Jacuzzi and of course the second helm position. The "Yapluka 85' DD." is the first "double deck" of a series that will include models of 100, 115 and 130 feet.
